

LUCKY GROUP

ENVIRONMENTAL POLICY

Lucky Group is a leading metal recycler in the Middle East committed to its responsibilities towards Environment, Health and Safety standards.

Lucky Group believes in leading the industry to minimize the impact of its activities on the environment. The key factors in achieving the objectives of our Environmental Policy are:

- To consider environmental implications as part of corporate strategy formation;
- To ensure adoption of preventative measures to contribute to the environment;
- To promote use of non-hazardous materials to minimise health hazards;
- To operate in compliance with all local and federal environmental regulations and ISO standards;
- To ensure a safe and healthy workplace for our workers;
- To communicate our environmental policy to our employees, clients and the public;
- To encourage environmentally aligned responsible behaviors;
- To promote efficient use of utility resources, including water and electricity;
- To minimize waste through recycling and adoption of 'reduce, reuse, recycle' waste practices;
- To participate in environment-promoting campaigns to support the global green movement; and
- To continually evaluate and improve the effectiveness of our environmental policy accordingly to our strategic and operational development.

The above will be regarded as a joint responsibility of Lucky Group management, employees and all stakeholders involved in our operations. At Lucky Group, we believe in synchronization between our operational practices, quality management, health and safety standards and our environmentally-compliant practices. We continue to foster our value and integrity through helping the environment.

Iqbal Shaban

President
